WORK EXPERIENCE

Ecommerce Manager – WooCommerce & Google Merchant Centre

2026 – Present

OTW Trading

- Manage and maintain WooCommerce/WordPress websites, overseeing catalogue setup, product listings, and site performance.
- Optimize Google Merchant Centre product feeds to improve product visibility, feed health, and shopping ad performance.
- Own ecommerce catalogue management end-to-end, ensuring accurate, well-structured, and up-to-date product data.
- Apply SEO best practices and product feed optimization to drive organic and paid ecommerce growth.

Senior Software Developer

Mar 2025 – May 2026

Nael Production

- Built scalable web apps with Laravel, Filament & Alpine.js; integrated third-party APIs for real-time data sync.
- Led code reviews, established quality standards, and authored technical documentation.
- Designed and maintained MySQL and MongoDB databases ensuring integrity and scalability.

Software Developer

Jan 2025 – Feb 2025

Nana Digital Ads

- Developed responsive TALL Stack apps (Tailwind CSS, Alpine.js, Laravel, Livewire) with mobile-first design.
- Collaborated with designers on pixel-perfect UIs; debugged complex front-end and back-end issues.

Full Stack Developer

Sep 2024 – Dec 2024

Two Z Business PLC

- Architected an HR Management System in Laravel covering payroll, attendance & employee records.
- Built secure RESTful APIs and optimized MySQL schemas for performance and scalability.

Web Developer

Jul 2023 – Aug 2024

Everlink Digital Technologies

- Contributed to a large-scale ERP system encompassing Transportation, HR, and Blacklisting modules built with Vanilla PHP.
- Developed and maintained the Transportation module, handling fleet management, route tracking, and logistics workflows.
- Built core features for the HR system including employee data management, leave tracking, and departmental reporting.
- Implemented the Blacklisting system to manage and enforce restricted entity records across the platform.
